

AI FOR A SAFER TOMORROW

POWERING SMARTER BUILDINGS

AI INSIGHTS. UNIFIED CONTROL. A SAFER, SMARTER BUILDING.

EdgeDX delivers real-time AI video analytics at the edge. UnityIS brings it all together—video, access control, intrusion, intercom, building automation and more—into one unified security and building management platform.

EdgeDX AI Bridge

Real-Time AI Analytics
at the Edge

- AI video analytics
- Runs at the edge (on-premise)
- Supports existing cameras
- Detects people, vehicles, objects, and custom events
- Sends events, metadata and video to UnityIS

Events
Metadata
Video Clips
(ONVIF/REST)

UnityIS®

Unified Security & Building
Management Platform

- Centralized monitoring and control
- Visualize AI events on interactive maps
- Manage access control, video, intrusion, intercom, building automation and more
- Create automated workflows and responses
- Available on-premise or in the cloud
- Open platform with REST API

Control Everything

A Safer, More Intelligent Building

Video Management
Live video, AI events, recordings

Access Control
Doors, gates, credentials

Intercom
Communications & notifications

Intrusion Detection
Alarms & monitoring

Building Automation
BACnet / Modbus integration

Visitor Management
Check-in, credentials, compliance

Emergency Response
Automated actions & alerts

3D Maps & Visualizations
Real-time situational awareness
