

Innovative Solutions for a Safer World

About Us

IMRON Corporation has been a trusted leader in the physical security industry for 27 years. We're the developers of the award-winning UnityIS® platform, used by thousands of customers across sectors including education, healthcare, logistics, and large venues.

Why UnityIS[®]

UnityIS[®] is built for large-scale, high-security environments, offering powerful tools to manage access across suites, VIP zones, staff entrances, and other critical areas. Its flexible architecture is ideal for innovation-driven facilities, combining robust security with seamless user experience to support both day-to-day operations and high-profile events.

Operational Tools

UnityIS® offers real-time graphic maps for situational awareness, along with customizable dashboards and a built-in badge designer to streamline operations.

The platform includes occupancy controls and hands-free access features for enhanced safety and convenience. With no software to install, users can securely access the system through any browser using Single Sign-On (SSO) and Multi-Factor Authentication (MFA).

Recognition & Reliability

UnityIS® has been recognized for its excellence in security innovation, earning five consecutive Secure Campus Awards and the 2024 Ambassador Circle of Excellence from the Active Shooter Prevention Project (ASPP). With proven deployments across stadiums, airports, schools, and hospitals, the platform delivers trusted performance in high-stakes environments.

Customers are also supported by a responsive, U.S. based team committed to service and success.

Security & Safety Summits

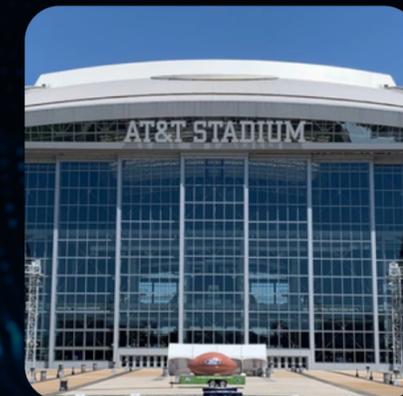

Imagine a world where every business, school, and community has the knowledge and tools to detect threats, respond effectively, and prevent tragedies. Our summits aim to bridge the gap between awareness and actionable solutions, empowering attendees to create safer environments for everyone.
