AI Video Intelligence for Modern Venues

Real-time awareness. Faster response.
Smarter operations.

Enhance Safety

Optimize Operations

Drive Value

Cameras Are Everywhere. Intelligence Isn't.

Thousands of cameras,
but no real insight

Incidents happen faster
than teams can respond

Manual investigations
take hours

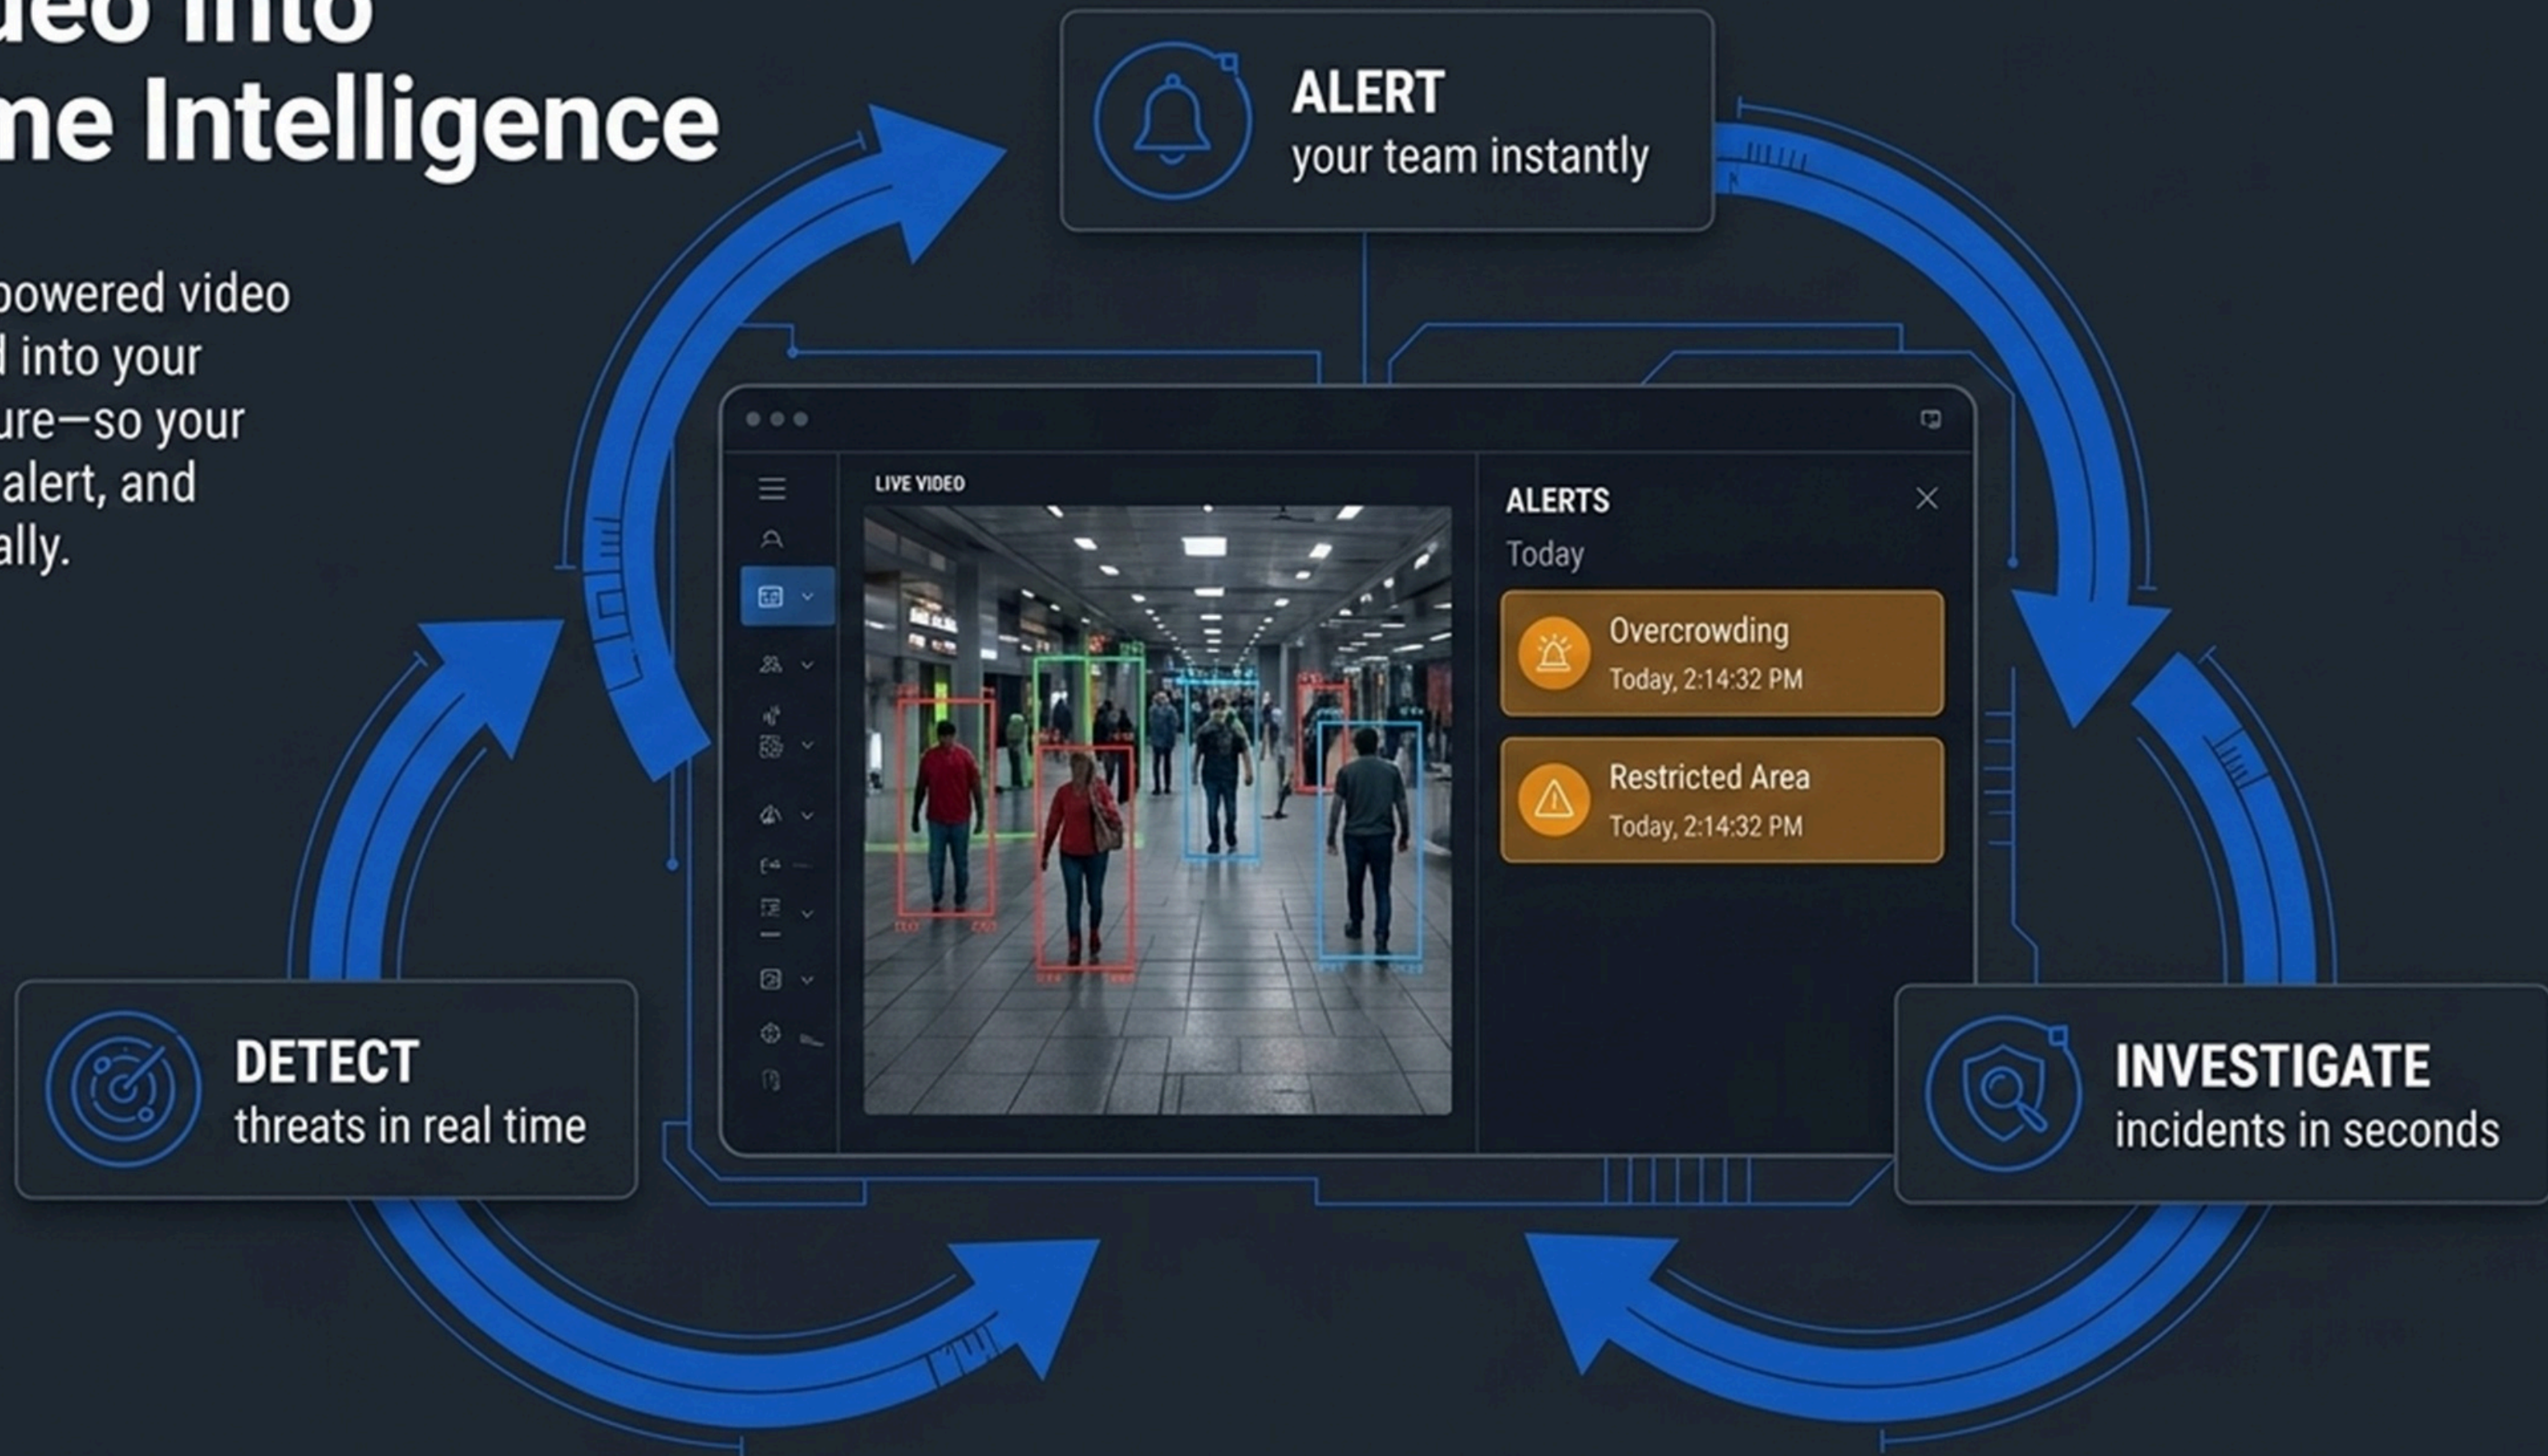

Overcrowding and safety
risks go unnoticed

**Video shouldn't just
record—it should think.**

Turn Video Into Real-Time Intelligence

IMRON delivers AI-powered video analytics integrated into your existing infrastructure—so your system can detect, alert, and respond automatically.

Built on What You Already Have

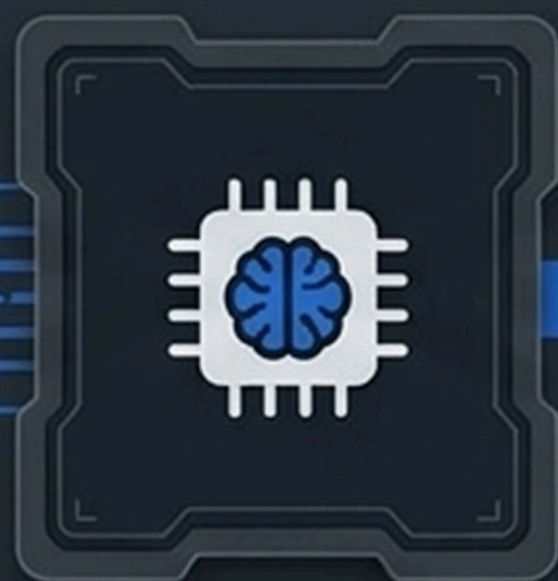

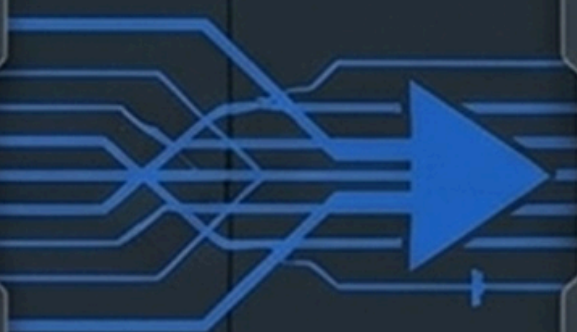

VISuite seamlessly integrates with your existing cameras and systems to deliver actionable intelligence.

The screenshot shows a software interface titled "Convergence Interface". It is divided into two main sections. On the left, under the heading "DOOR EVENT", there is text indicating an "Access Denied" event at "Main Entrance – Door 3" on "Today 2:14:32 PM" by an "Unknown" card holder. On the right, under the heading "LIVE VIDEO", there is a video player showing a person in a dark hoodie and mask attempting to open a glass door. The video player includes a timestamp "2022-04-29 12:49 AM" in the top left corner and a playback control bar at the bottom with play, pause, and next buttons, a progress slider, and a volume icon.

Find Anything. In Seconds.

Powerful AI search makes it easy to find exactly what you need—across cameras and time.

SEARCH BY APPEARANCE

Search by appearance, clothing, or attributes

Search by vehicle type, color, or license plate

Filter by time, location, and camera

Get results in seconds
